Lean Analytics bills itself as how data can be used as a startup. But it really is how you use data to make and check business decisions. And it takes the discussion of key performance indicators and puts them into a context where 1. data is readily available and 2. analyzing the data is relatively easy if you knew what data to look for and what and why you are analyzing it.

One of the things Ben and I have been discussing a lot is the concept of the One Metric That Matters (OMTM) and how to focus on it. Founders are magpies, chasing the shiniest new thing they see. Many of us use a pivot as an enabler for chronic ADD, rather than as a way to iterate through ideas in a methodical fashion.
