The Saxon Math series as a whole is hugely popular among homeschoolers. It is important to be aware that the Math Intermediate series (for grades three through five) and the series reviewed here (Math 5/4 and up) are very different from the Saxon program for K-3. One reason Math Intermediate and other Saxon courses for fourth grade and above are used by so many homeschoolers is that they allow ...

Vectors that map to their scalar multiples, and the associated scalars In linear algebra, an eigenvector or characteristic vector of a linear transformation is a nonzero vector that changes by a scalar factor when that linear transformation is applied to it. The corresponding eigenvalue, often denoted by λ , is the factor by which the eigenvector is scaled ...
